Pit Viper 271 blasthole drilling rig

The Pit Viper 271 is the drill that put the Pit Viper on the map. It is one of the most productive drills available for rotary tricone and down-the-hole drilling of 6-3/4 in to 10-5/8 in (171 mm to 270 mm) diameter holes. It operates in almost every surface mining application out there. Gold, copper, coal, iron ore, phosphate, silver — you name it. The PV-271 has probably drilled it.
