Commander HMI100

The Titan Commander HMI100 is part of the 4th generation Titan Collision Avoidance System designed for all mining environments

This device is a multi-functional Human Machine Interface (HMI) that provides the operator with critical information in a simple manner. Configurable and extendable, this device is ideal for a wide range of applications.

⊕ Main benefits

Access control. Built-in fingerprint scanner and card reader for secure access control.

Customized alerts. Provides audio and visual feedback that can be catered to a specific region - ensuring the operator receives alerts that cater to the language preferences.

Connectivity and internal storage. Equiped with WiFi for seamless connectivity and internal storage for redundancy in system logs and storing configuration files, audio and images.

Functions and features

CPS (Collision Prevention System) and information display

Receives information from the Gateway

Functional expandability (2x Titan expansion modules)

Internal battery back up

Log all interactions and events (redundancy)

Voice instructions to operator

License management (card and biometrics)

Functions

- 7" colour LCD with auto brightness control
- Unique identifier
- Vehicle identifier
- Internal battery backup
- Data logging
- Over-the-air (OTA)
- Wi-Fi, ethernet, CAN FD, USB
- NFC wireless configuration

United. Inspired.

Performance unites us, innovation inspires us, and commitment drives us to keep moving forward. Count on Epiroc to deliver the solutions you need to succeed today and the technology to lead to tomorrow.
